SCHMIDHAUSER

ELECTRICAL

What being ALWAYS ON means to us

Three generations of Electrical knowledge starting in the town of St. Gallen, Switzerland, Schmidhauser Electrical has built a reputation for outstanding service and the highest levels of expertise when it comes to all of your electrical requirements. This Family run business has established a household name here in South Africa.

Our 24-hour call out service, unrivalled after-sales maintenance packages, warranties on all workmanship and SABS guaranteed products have led to us becoming the electrical service leaders in the industrial, residential and commercial sectors.

Meeting our clients' needs with the highest quality products and service is what being "Always On" is all about, but don't take our word for it – contact us today and discover Schmidhauser quality for yourself.

- Full-service maintenance plans
- One year warrantee on all materials supplied
- All works carried out by licensed electricians
- Pensioners' discounts available
- Electrical works done under the Occupational Health and Safety Act Regulations

The heat map for genuine efficiency

Thermal imaging

An infrared imaging science that allows our expert technicians to ensure electrical efficiency, and eliminate potentially dangerous and expensive hazards. Therefore ensuring your business will receive the most accurate and comprehensive electrical inspection.

- Prevent a fire before it starts
- Reduction in energy costs
- Prevents unplanned downtime due to electrical faults
- Reduction in maintenance costs by identifying abnormal conditions – before they lead to catastrophic failure
- Improvements in machine efficiencies by identifying cooling system inefficiencies
- Reduce insurance premiums via fire hazard detection on an annual basis
- The range of applications is unlimited
- Hot joints caused by faulty connections in electrical circuits
- Electrical phase unbalance that leads to high electricity bills and tripping

Other abnormalities that can be solved:

- Insulation Voids / Building Envelopes
- Refractory and furnace Interiors
- Heat exchangers / Difference in thermal capacitance
- Concrete / Asphalt delamination
- Water ingress in composite materials
- Paper manufacturing
- Gas / Liquid levels
- Leaking valves / Steam traps
- Pipes / Hoses – Hydraulic trouble shooting Bearings / Drive Belts
- Electrical switchgear
- Motor Control Centers
- Gear lubrication problems
